

Big Data → Business Intelligence → Managed Services

“ICT” , “M2M” , “Industrial Internet” , “Internet of Things”

Carbon War Room – M2M will generate cost savings and new revenues that will add \$10 - \$15 trillion to global GDP

- Energy – production and transmission
- Transportation – route optimization
- Built Environment – building systems and equipment optimization
- Agriculture – improved efficiency, livestock management, planting fertilizing, water use

Real time data and analytics
— accessible, aggregated
and actionable

Higher levels of efficiency
enabled through data-driven
decision making and
execution

Technology solutions which
were once not affordable, are
now affordable and driving
measurable returns
