

BEPP/OIDD 763: Energy Markets and Policy

Provides students with an economist's perspective on:

- Energy markets and environmental regulation
- (De-)regulation of power markets
- Oil and gas pricing and contracts
- Geopolitics and investment risk
- Cap-and-trade
- Climate change agreements
- Renewable energy finance

Features guest lectures from:

- Energy industry executives/CEOs
- Entrepreneurs in energy efficiency, electric vehicles, and solar energy
- Politicians
- And more!

Two energy strategy simulation games

- OPEC & electricity bidding

Answers questions such as:

- Why do experts and politicians disagree on climate change policy?
- Should we subsidize renewables or tax fossil electricity?
- How well do we predict oil prices?
- How could Enron squeeze every penny out of California?

Professor Arthur van Benthem
